

## **JAYAZYME GRANULES DETAIL**

JAYAZYME GRANULES is a unique plant growth bio rejuvenator derived from a special microbiological fermentation process and is in granular form. It has various essential plant hormones, enzymes, amino acids and vitamins, which support faster growth and better yield. It boosts plant metabolism and plays a vital role in cell multiplication.

### **BENEFITS:**

- Better root establishment
- Recover the plant from stress
- Avoids Bacterial wilt disease (Erwinia)
- Faster growth
- Higher yields

### **DOSAGE:**

#### **1. BANANA & PAPAYA:**

- At the time of planting @ 10gm / per plant
- 20<sup>th</sup> day after planting @ 10gm / per plant
- 3<sup>rd</sup> month after planting @ 25gm / per plant
- 5<sup>th</sup> month after planting @ 25gm / per plant

#### **2. COCONUT & ARECANUT:**

- June & September month @ 50gm / per plant

#### **3. FOR CUT FLOWERS IN POLY HOUSE & OPEN CULTIVATION:**

- Once in 2 months @ 80kg / acre

#### **4. FOR VEGETABLES:**

- At basal dose @ 80kg / acre
